# IN MONTH'S RECORD

Commissioner McAdoo Admits that He Is Shocked Over the Revelations in Official Police Reports Just Turned In for the Month of August.

More Than Eight Burglaries Every Day, with Numerous Ones Not Reported, and Twenty-Four Homicides Recorded in Thirty-One Days.

#### ONE MONTH'S CRIME RECORD IN THE CITY OF NEW YORK.

That Commissioner McAdoo has been unaware of the prevalence of crime in New York, about which there has been unanimous complaint in the press, was made apparent to-day when he got a detailed statement of the crimes of a month. He admitted that he was shocked at the showing.

Friends of the Commissioner have been asserting in his behalf that as a man with business training he had left the detail work of the department to his subordinates, depending for information upon their acports. He became satisfied that these reports did not cover the situation upon his return from a vacation a few days ago and set out to extract some facts.

Blotters were searched and the crime record of the month of August was made up. It showed 444 felonies of the lygher grades of orime, of which 24 were murders and 253 burglaries.

#### MORE THAN 8 BURGLARIES A DAY.

Arrests were made in less than half of the felonies reported. The eds of the department show that the burglaries exceeded eight a day. This is the record from the police blotters. It does not include the scores of burgiaries that were not reported at all, for there are sections of the city that are burglar scourged and the inactivity of the police has so disgusted the victims that they refuse to go near a police station.

The Commissioner was frank in admitting that the flat wee appalling, and that there was room for great improvement in police work. He has iaid plans to get returns from every precinct and to pin the responsibility laxness where it belongs. One of the steps he has taken toward the suppression, it possible, of crimes of violence among Italians of the lower sort is to organize a small bureau of detectives to work exclusively in the Italian quarter under Detective-Sergeant Petrosini.

Mr. McAdoo said that the recent hold-up of women in the Bronx was entirely up to the police of that section, and he will see why the district does not receive better protection from his men.

It is an outrage," said the Commissioner, "that women should be attacked so frequently in a city like New York, and I will strain every effort to see that my men perform better and more efficient service.

WANTS REPORTS FROM CAPTAINS.

"I have just issued an order to all my police captains that they must make a daily report to me of what they do in their precincts, I want to know how often they go out on patrol and what surveillance they place over their men. Hitherto the reports of the captains have not been satisfactory, and D am altogether displeased with the way things are running. Now, with these daily reports, I will be able to keep careful tab on every police captain in the greater city, and know whether or not he is exercising the care he should in the command of his precinct."

WOUND ON HER HEAD WAS INFLICTED BEFORE DEATH.

Coroner Not Ready to Hear Criminologist in "Martha Laimbeer" Inquest, but Doctors Tell of Poison.

LYNBROOK, L. I., Sept. 16.-The in west into the death of the woman found last April in the woods near Greenfield Cemetery at Hempstead and buried under the name of Martha Laimbeer was resumed this afternoon before Justice A. B Wallace. William Clemons, the criminologist

who claims to have discovered the identityof the woman and that she was murdered and jarried to the woods, was not present, the Justice deciding he was not ready to hear him.

Dr. J. H. B, Denton, father-in-law o Justice Wallace, who performed the au-topsy of the woman and received a 3100 bill in an anonymous letter to bury her. and Walter H. Kent, a chemist, of No. 292 Cliaton place, Brooklyn, who analyzed the stomach contents, were the only witnesses examined.

District-Attorney James P. Neman conducted the questioning for the peowoman's organs were normal. He found eye in the nature of a contusion, exposing the bone. Blood clots and hemorrhage indications were present. He thought the wound was caused by a blow from some blunt instrument before dath. There were external injuries on the back of the hand, between the knouckles and wrist. Dr. Denton observed spots
